

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

THE

INTRODUCTION.

AS in treating upon most Subjects, it seems to be naturally requisite, that they be first of all perfectly and distinctly explained, by such particular Definitions thereof, or short Dissertations thereon, as shall be capable of giving the Reader the most perfect Idea of their Nature, Design, and Use, &c. I apprehended, that before I enter'd upon the subject Matter of this Treatise, which is designed to give *A Complete View* of that Part of his Majesty's Revenue, which is usually distinguished by the Title of CUSTOMS; it might not improperly be expected, that I should give some Account of their Rise and Progress: And therefore I have attempted to acquit myself, in the best manner I was able, by a short Deduction of the several Variations, and different Regulations they have underwent, from the first Original, to the present State of that Revenue.

Tho' by the Law of Nature all Things were common, and all Persons equal, there being neither *Meum* nor *Tuum*, King nor Subject; yet when the Law of Nature came to be limited by the Law of Nations, and such a Thing as Property came to be claimed, it naturally caused Trade and Commerce; whereupon Kings or Rulers became absolutely necessary to maintain and defend such Property and Commerce. And in order to support those Kings or Princes in their Offices of Government, and to defray the Expences which they must necessarily be at, in maintaining Ambassadors at foreign Courts, chiefly to

aforesaid Duties came to be stinted and restrained, and in a great measure yielded up by the Crown, to the Parliament: For upon the frequent Petitions of the Subjects for the Remission thereof, and their free Offers of sufficient Supplies by Parliament, for all necessary Occasions; King *Edward* the Third, and the several succeeding Kings and Queens, by his Example, were contented to suspend their ancient and hereditary Duties, which being very much decreased, were grown deficient; and in lieu thereof, to accept of either such temporary Subsidies or Aids by Parliament, as should be thought sufficient to assist them upon any extraordinary Occasions or Emergencies; or of such fixed and settled Subsidies, as should be sufficient for the Support of the Honour and Dignity of the Crown, the Defence of the Realm, and the Safeguard of the Seas, during their respective Lives: And those parliamentary Subsidies were always composed of two several and distinct Parts, *viz. a Tonnage, and a Poundage.*

TONNAGE was payable upon all WINES imported, after the particular Rates, and according to the particular Methods prescribed by the several Laws which granted this Duty to the respective Kings and Queens; being at first no more than two Shillings *per* Ton, though in succeeding Reigns it was very much increased.

POUNDAGE was payable on ALL OTHER MERCHANTIZES imported and exported, according to the particular Rates and Values prescribed by the several Laws which granted this Duty to the respective Kings and Queens; being at first no more than 6*d.* in the Pound of the particular Rates or Values, tho' in succeeding Reigns it was advanced to 12*d.* in the Pound. And to this Subsidy of *Tonnage* and *Poundage*, there was likewise, in the latter Reigns, annexed,

A Subsidy of WOOLLEN CLOTHS, or old Drapery, which was payable upon all Woollen Cloths exported; after the particular Rates, and in the particular Proportions prescribed in the respective Books of Rates.

But after the Restoration of King *Charles* the Second, the aforesaid Subsidies, which before had underwent several different

different Regulations, were settled and established upon the Foundation whereon they now stand, and granted to his said Majesty during his Life, *For the defraying of his necessary Expences in guarding and defending the Seas against all Persons intending the Disturbance of his Subjects in the Intercourse of Trade, and the Invading of this Realm*; by an Act passed in the twelfth Year of his Reign, entitled, *A Subsidy granted to the King, of Tonnage and Poundage, and other Sums of Money payable upon Merchandize exported and imported*, referring to, and enforcing, *A Book of Rates of Merchandize, &c.* according to which the said Duties were to be levied and collected.

And upon the Model of, and with Reference to, this Subsidy of Tonnage and Poundage granted to King Charles the Second, there has, for the defraying the Expences of Wars and other necessary and extraordinary Occasions, been granted by subsequent Acts of Parliament, several Additional Subsidies, Impositions and new Duties; which being to be levied and collected after the Manner of the afore said Subsidy, upon the Importation and Exportation of several sorts of Goods and Merchandizes; are usually, tho' improperly, comprehended under the general Title of CUSTOMS.

Thus have I here given such a short Narrative of the Rise and Progress of that Part of his Majesty's Revenue which is commonly called the CUSTOMS, as I thought might be sufficient to give a just and perfect Idea, and prepare the Reader for the Perusal, of the following Treatise; which is an Essay towards a compleat System of that Revenue as it now stands, without any regard to the former Regulations, which are either repealed or expired.

For the CUSTOMS are now really become a perfect science, there having been no less than thirty additional branches, or particular Duties imposed since the Restoration of King Charles the Second; and the Laws prescribing the Manner and Means for the levying and collecting of those

Duties, with those that have been found necessary to have been made for the Preservation and Security of the Revenue in general, within these 50 Years past; have so increased the number, that the Body of Custom-Laws is now swelled to above ten times its former Bulk. Therefore, as they are so numerous, and many of them often made with an Eye only to some particular Purpose, without regard to the Circumstances and Regulations prescribed in former Acts, it must naturally happen, that they will sometimes very much clash and interfere, so that in many Cases it is very difficult to fix a particular Point: and as the Repeals, Expirations and Revivals of several Acts are so frequent, that it is often difficult to know whether a Law is in force, or not; it is no wonder that they are no better understood by too many, whose Business it is to execute them, and much less by most others, whose Interest it is to know the Privileges to which they entitle them, and the Penalties to which they subject them; that they may reap the Benefit of the one, and avoid the Punishment of the other.

But that a Subject of such general Importance as the CUSTOMS payable to the Crown of *Great Britain*, may no longer remain so great a Mystery; I have here endeavoured to set them in the clearest light I was capable, by methodizing and digesting them in such a manner, that I apprehended would make them the most easily and readily understood: so that I flatter myself, any one who has had but a tolerable Education, and will not think a little Pains and Application too much, may in a short time, without any other Assistance, attain to a competent Knowledge of the several Parts of this Revenue.

F O U R T H E D I T I O N.

IT is needless to say any thing in praise of Mr. Crouch's last Edition of this Book of Rates; the universal Approbation it has met with, and the general Use of it, both among Officers of the Customs and Merchants, are a better Recommendation of the Performance, than the highest Encomiums from the Pen of an Editor. Every one who is thoroughly acquainted with the Work, must be sensible it was a Production of Labour and Ingenuity, and that the Author truly merited the Encouragement he met with.

But tho' at its first coming out it was, and at present is in the main, a useful and valuable Performance; yet Time has render'd it in some measure imperfect, upon account of the several Alterations of, and Additions to, the Laws of the Customs, enforced by Acts of Parliament, subsequent to its Publication. For which Reason, as the Sale of the last Edition, and the daily Call for the Book, has made another necessary; it was thought proper, in preparing this Edition for the Press, (in order to render the Work the more useful) to make such Alterations and Additions, with respect to the subject Matter of the Book, as those subsequent Laws do require. In every other respect, the Reader will find it the same with the last Edition: and he may be assured that

the utmost Care has been taken, that nothing should be omitted which might tend to make it as complete and correct as possible. How far we have succeeded, is submitted to the Judgment of the judicious Reader; who it is hoped will make an Allowance for any Error in Judgment, which may arise from the Ambiguity of an Act of Parliament, or the Difficulty of reconciling one Act with another; for, as Mr. Crouch has justly observed, "they are frequently made " with an Eye only to some particular Purpose, without " regard to the Circumstances and Regulations of former " Acts."

Tho' in strictness, when Wines are brought into *London* by Certificate from the Out-Ports, they should pay only the Difference of the Duty, or what they have paid short of the Duty due in *London*, according to the nature of the Entry; yet it is the Practice always to take the said Difference as if the Wines had been enter'd *fill'd*, and so not to allow this twelve *per Cent.* for Leakage, notwithstanding the Wines may have been at first enter'd as *unfill'd*.

(f) And upon the Importation of Wines in Casks, there is also the following Allowances to be made out of the Gross Duty, *viz.*

By 1 Jac. II. cap. I. §. 4. — continued — During his Life.

 the rest of the Branch of Customs — }

This Duty, as well as the Old Subsidy and Additional Duty, consists of a *Tonnage and Poundage*; being payable in ready Money upon all Goods and Merchandizes liable to those Duties imported from any Port or Place of the *Mediterranean Sea* beyond the Port of *Malaga*, into any Port of *Great Britain*, in any (*British*) Ship or Vessel that hath not two Decks, and doth carry less than sixteen Pieces of Ordnance mounted, together with two Men for each Gun, and other Ammunition proportionable: Unless one Moiety of her full Lading outwards was Fish (taken (a) and cured by his Majesty's Subjects only) exported from any of his Majesty's Dominions; in which case, the Goods or Merchandizes imported in the same Ship for that Voyage, are not liable to this Duty.

The Duty.

The practical Method of computing this Duty, is by taking { $\frac{1}{2}$ Part of the Neat
 Old Subsidy and
 Additional Duty.
 Upon Exportation — NOT DRAWN BACK.

As the Ports in the *Mediterranean Sea* are so very numerous, and many of them not commonly known, I have, as a Guide for the Collection of this Duty, here added such as are beyond the Port of *Malaga*, as they appeared to me, upon consulting the best Maps and Treatises of Geography: and though many of them are but inconsiderable, and others such as perhaps are seldom or never traded from; yet I chose rather to insert them, than to omit any Place that might possibly be wanted to be known.

Ports in the *Mediterranean Sea*, beyond the Port of *Malaga*.

The foregoing Duties are such as are at present payable to his Majesty upon Goods and Merchandizes imported, exported and brought Coastwise: But there being two other Duties, (which originally were also payable to the Crown, though now they are by particular Grants become a private Right,) the Nature whereof is proper to be known by the Officers of the Customs, in regard the Wines liable thereto, are exempted from Payment of Part of the Customs, &c. I thought it proper to give a short Account of the said Duties.

N^o 35.—Prisage and Butlerage.

THESE Duties were originally the only Custom that was payable upon the Importation of Wines, and were taken and received by virtue of the Regal Prerogative, for the proper Use of the Crown: But for many Years past there having been granted by Parliament, Subsidies, or Aids to the Kings of England, and those Duties not repealed but (a) confirm'd; they have been pleas'd to grant the same away to some Nobleman, who by Virtue of such Grant or Patent is to enjoy the full Benefit and Advantage thereof, and may cause the same to be levied and collected in the same Manner as the Kings themselves might and were formerly wont to do.

This Duty is either *Single* or *Double*.

SINGLE PRISAGE is *one Ton*, and is due in Kind, when the Quantity imported amounts to or exceeds *ten Tons*, but is under twenty Tons: For if under ten Tons, there is not any Prisage due.

DOUBLE PRISAGE is two Tons, and is due in Kind, when the Quantity imported amounts to, or exceeds *twenty Tons*, which is the most due out of any

one Ship: One Ton to be taken before, and the other behind the Mast, at the Pleasure of the King's Butler or Prifage-Master; who may taste the whole Cargo, and chuse the best Wines, and fill up the Vessels, or chuse those that are the fullest, and take them away, allowing only (c) 20 s. per Ton for Freight: Or if the Owners had rather, he may compound with them for the whole Quantity, at a certain Price, as is the Practice in *London*, &c.

But as there is a Difference in favour of the Prifage-Master, between the Customs and other Duties due to the Crown, which are to be paid by him and the Merchant; the Officer of the Customs must carefully observe, that there be always a sufficient Quantity imported, to allow the said Prifage.

BUTLERAGE is a Duty of 2 s. for every Ton of Wines imported by Merchants Strangers; being a Composition (in lieu of the Duty of Prifage payable in Kind by *English* only,) in consideration of the Liberties and Freedoms granted to them by King *John*, and King *Edward* the First, by a Charter called (d) *Charta Mercatoria*.

CHAPTER the Second.

CONTAINING

The Book of the Rates of Merchandize Inwards and Outwards, as rated and agreed on by the Commons House of Parliament, for Payment of the Old Subsidy granted by the Act of Tonnage and Poundage made 12 Car. II. cap. 4. and subscribed with the Hand of Sir Harbottle Grimstone Baronet, Speaker of the House of Commons: And also referred to by the several subsequent Acts which granted the other Subsidies and Impositions, &c. for the Payment of the same.

LIKEWISE

An Additional Book of the Rates of Goods and Merchandizes usually imported, and not particularly rated in the aforesaid Book of Rates, as rated by an Act made 11 Geo. I. cap. 7. and signed by the Right Honourable Spencer Compton Esq; Speaker of the Honourable House of Commons: Being instead of the Values upon the Oath of the Importers, for Payment of the several Subsidies and other Duties: And the Rates of such Goods as are particularly rated by any other Acts; the which are quoted under the particular Species of Goods to which they relate.

TOGETHER WITH

The Rules, Orders, Directions, Allowances and Regulations annexed to the aforesaid Books.

To which is added,

The neat total Amount of the several particular Duties payable from those Rates, on each Species of Goods therein Rated, as also on such as are not therein Rated, but pay Duties ad Valorem; with The neat total Amount of the several Duties to be repaid or drawn back upon Exportation of the Goods to foreign Parts in Time, and The neat Duties to be paid upon Goods brought Coastwise, and to be drawn back, if afterwards exported to foreign Parts.

HAVING in the former Chapter fully treated of each distinct Branch of the Revenue of Customs, the greatest part whereof had Reference to the Rates of the respective Goods on which they are payable: I have in this Chapter given the several Rates or Values of Goods and Merchandizes, as prescribed by several Acts of Parliament; with the Addition of every thing that I apprehended would be proper to be observed thereon, either for the Information of the Officers of the Customs, or the Merchants: For the better understanding whereof be pleased to observe,

1. That all Goods and Merchandizes are inserted under their proper initial Letters, unless such as are only one particular Species of many others of the like Nature, for which there are general Heads erected, under the initial Letter of

such Head, as in the Cases of *Corn, Drugs, Furs, Grocery Wares, Linen, Wood, &c.* so that when any particular Sorts of those Goods are wanted, they must be sought under their proper Head, and not under their particular initial Letter.

2. That though several of the Goods expressly *Rated* are *prohibited* to be imported; yet as they were rated, I have charged the Duties that they would have been liable to, in case there were not any such Prohibition; But as a Caution against a general Mistake, *That all Goods rated, and thereby charged with a Duty, may by Virtue of such Rates be lawfully imported, notwithstanding they were before particularly and expressly prohibited;* I have under each Article or general Head of Goods prohibited, noted such Prohibition, referring to the Index, for the particular Circumstances, &c.

3. That as several Sorts of Goods that are not *Rated*, are also *prohibited*; I have likewise inserted them under their proper Letters or Heads, amongst those that are rated, with a like Reference to the Index.

4. That all Regulations relating to any particular Species of Goods are either inserted under such Goods, or refer'd to in the Index: But that, as for what relates to the Trade from particular Places, as *Turkey, Russia, the British Plantations, &c.* or to other general Regulations for the Importation of Goods, I must refer to the Index, particularly to the Heads of *Goods, Plantations, Deal-Boards, &c.*

5. That the several Species of Goods which have the rest of the Line or Lines

Likewise printed in Roman Letters, and whose Rates are inserted —

Printed in Italic Letters —

In the first Column of Rates—Were so rated by the Act of Tonnage and Poundage passed 12 Car. II. cap. 4. Annoq; 1660; unless where they have been since altered; in which Case, the Act that made such Alteration is always quoted.

In the second Column of Rates—Were so rated by an Act passed 11 Geo. I. cap. 7. Annoq; 1724; being instead of the Values of those Goods which before were to be ascertained upon the Oath of the Importers: But not to extend to such of the said Goods as are of the Growth, Product or Manufacture of the *East-Indies* or *China*.

And whose Rates are inserted in the *first Column of Rates*, were so rated or otherwise alter'd by particular Acts, the which are always quoted.

And not at all rated, but yet charged with Duties, are such as pay either all or part of the said Duties, according to their Values upon the Oath, &c. of the Importers.

And not at all there rated or charged with Duties, are such as are rated under some other Letters or general Heads, to which there is always Reference.

Note, *The Goods rated by 12 Car. II. and those rated by 11 Geo. I. being in many Cases under different Regulations with respect to the Duties to which they are liable; I was obliged for Distinction sake to erect two Columns of Rates.*

6. That the third and fourth Columns contain, *The total Amount of the new Duties to be paid on the Importation of all Goods and Merchandizes, as well by British as by Strangers, or Aliens; as computed from the aforesaid Rates, Values, &c. to the utmost Exactness.*

7. That the fifth Column contains, *The total Amount of the New Duties, to be repaid or drawn back upon Exportation of the said Goods within three Years, (the Time limited by Law;) whether they were imported by British, or by Strangers.*

8. That in the aforesaid third, fourth and fifth Columns, the Duties of all Goods except *Tobacco*, are computed as if they were *all paid down at Entry in ready Money*, notwithstanding some of them may be *secured by Bond*: But as the Discounts for prompt Payment are very large, the said Duties are very seldom bonded; and to have inserted them to each Species of Goods, would have required three more distinct Columns; I can therefore only advise, that where the Merchant chuses to give Bond, he would purposely compute the Duties; for which the *References* mentioned in the next Paragraph will be his Guide. And that the said Duties consist of Pounds, Shillings, Pence, twentieth parts of a Penny, and fractional Parts of those twentieths; for though even a Farthing would be exact enough for One of any Species of Goods, yet where the Duties of a large Quantity are required, if the greatest Exactness for One is not observed, the Difference may sometimes be pretty considerable: The Intemperance wherewith I experienced in my former Edition, where I omitted any part of a Penny less than one twentieth.

9. That the sixth and last Column contains *References to the several particular Branches* which compose the aforesaid total neat Duties, to be paid and repaid; the Use whereof you will find fully exemplified and explained by a Table, placed after the Duties on *Goods brought Coastwise*; towards the latter End of this Chapter: Being chiefly design'd for the Use of the Officers, to direct them in the Computation of the particular Branches, to which each Species of Goods are liable.

10. That tho' the aforesaid neat Duties were more particularly designed for the Use of the Merchants, who need not trouble themselves about the several Branches which compose the total Duties: Yet it will be found extremely serviceable to the Officers of the Customs in chequing their Operations of the several respective Branches, by likewise computing the total Duty; which if right, will be found to agree with the Total of the several Branches.

11. That the Method observed in relation to the Goods and Duties Inwards, is also pursued in treating of *Goods exported, and brought Coastwise*.

12. That besides the several Duties before-mentioned payable to his Majesty, there are likewise payable to the City of London, the Duties of *Seavages, Passage, &c.* for all Goods imported into, or exported out of the said City by Strangers or Denizens, as also for certain enumerated Goods imported by *British* in foreign Ships: For the Tables of which Duties I must refer to Chapter the fourth.

 to pay for the Use of the Town of Southampton, for every Pipe or Butt
 Wine-Les imported into any Port, are to pay the same Duties as Wine; But
 are exempted from Drawback upon Exportation. 1 Geo. II. cap. 17.
 Note, *As no* Wines, except of the Dominions of the Great Duke of Tuscany in
 open Flasks, or of Turkey, or any other Parts of the Levant Seas, may be
 imported in Flasks or Bottles; I have purposely omitted the Duties of all other
 Wines, otherwise than in Casks.

And that the part of the Duties on Wines may be secured by Bond; yet as it
 does not frequently happen, I have charged all the Duties, by supposing them
 to be paid down in ready Money: Therefore when Bond is to be given, you
 must consult the Additional Duty, Import on Wines and Import 1697.
 But will regard to the Importation of Wines, it must be observed that the
 may not be brought in any other than British or Irish Ships, or Ships of the
 Built of the Country of which they are the Growth, or of the Port where they
 can only, or are most usually first shipped; nor from the Netherlands or Ger-
 many, except *Rhenish* or Hungarian Wines from Hamburg. Vide Deal
 Boards and Goods Inwards, Art. 6. in the Index.
 For other Regulations, vide Wines in the Index.

By the two first Acts, this Duty is appropriated to the Building of 50 New Churches, and the Maintenance of the Ministers; and by the 5 Geo. I. cap. 9. §. 5, 13. is charged with a Fund of £. 21000 *per Annum*, for the raising of £. 36000 for the like, and other Purposes; and with another Fund of £. 30559 : 14 : 0 *per Annum*, for the paying off, and discharging of £. 50000, with Interest at *l. 4. per Cent. per Annum*, for the fortunate Tickets in the Lottery 1719; which Sum of £. 50000, or any Part thereof, was, by 6 Geo. I. cap. 4. empowered to be taken into the Capital Stock of the South-Sea Company, and the said Company to be entitled to an Annuity after the Rate of *l. 4. per Cent. per Annum* for so-much as they should take in. And the Surplus, which, by the two last mentioned Acts, was reserved for the Disposition of Parliament, is, by the 13 Geo. I. cap. 21. §. 1, 12. 20. after *Michaelmas 1726*, applied to the Discharge of £. 3700000, with Interest at *l. 4. per Cent. per Annum*, to be raised for the Service of the Year 1727. But by 1 Geo. II. cap. 8. §. 1, 2, 3, 5, 16. upon being freed from all former Charges and Incumbrances, by paying off the Proprietors, and cancelling the Exchequer Bills, the Bank of England, by advancing the Sum of £. 1,750,000, are, after 24 June 1728, entitled to an Annuity of £. 70000, being after the Rate of *l. 4. per Cent. per Annum*.

As this Duty is to be raised, levied, and collected in the same manner, and by the same Rules and Ways, &c. as the other Duties on Coals and Culm brought Coastwise into the Port of London; and as those Duties may be secured to be paid in three Months, and upon Payment of Ready Money, are allowed a Discount of *l. 10 per Cent. per Annum*, (which for the said three Months is *l. 2½ per Cent*) therefore if this Duty of 3 Shillings *per Chaldor*, or Ton, be paid down, it will be reduced to *l. 0 : 2 : 11½*, as above. 9 *Ann. cap. 22. §. 1. &c.*

Having in the Introduction to this Chapter, fully shewn the *Nature and Design thereof*, and in the Prosecution of that Design, having used my utmost Endeavours to exhibit the several Duties on Goods and Merchandizes Inwards, Outwards, and Coastwise, in the most plain and obvious Manner I was capable, so that the Total Amount thereof might be discovered at one View; there seems to be nothing farther necessary towards the perfect Understanding of the Whole, than to shew the *Nature and Use of the References* on the Right-Hand Margins of the several Pages.

A TABLE of the References, or Letters and Figures, on the right-hand Margins of the preceding Columns of Rates and Duties; with a List of the particular Branches to which they refer: explained by Examples.

THE aforesaid References are designed to point out the several Branches that are chargeable for the respective Goods, against which they are affix'd, and which compose the total Duties to be paid and repaid: Therefore, when the Branches to which any particular sort of Goods be liable, are desired to be known, it must be observed:

- I. That the Letter, or Letters of Reference affixed to such Goods, (without regarding the Figure or Figures, if any) must be sought for in the first Column of the following *Table of the References, and the several particular Branches to which they refer.*
 - II. That the Numbers in the other Columns, which stand opposite to such References, do denote the particular Branches, as they are distinguished by the said Numbers in Page 1, 2. and also again under the Title of, *A List of the particular Branches refer'd to by the Numbers in the foregoing Table, in Page 297, following.*

So that by the aforefaid *Table of the References*, and the *List of the Branches* therein refer'd to, the particular Duties to which any Species of Goods are liable, may be readily difcovered; as will more plainly appear by the following Examples, *viz.*

I. Suppose the feveral Branches chargeable on *ALPISTI*, were defired to be known.

Upon Recourfe to <i>Alpisti</i> , it will be found that the Marginal Letter of Reference affixed thereto, is _____	} ——— A.
Oppofite to which Letter in the aforegoing <i>Table of References</i> , are the Numbers _____

But as the *Imposts* 1690 and 169 $\frac{2}{3}$ confift of a great Number of Articles, it would be very tedious, and in many cafes very difficult to difcover the particular Head by which many forts of Goods are chargeable; I have therefore to the Letters of Reference for all the Goods liable to thofe Duties, annexed a Figure or Figures, to diftinguifh the particular Article or Head of thofe Duties: as,

II. Suppose the feveral Branches chargeable on *BRIMSTONE*, not French, were defired to be known.

Upon Recourfe to fuch <i>Brimstone</i> , it will be found, that the Marginal Letter and Figure of Reference, are _____	} ——— B 5

Which by the *List of the particular Branches*, as before directed for *Alpisti*, will point out the particular Branches to which *Brimstone* is liable: And by the Addition of the Figure 5 to the Letter, it will appear that that Commodity is chargeable with the 5th Article of N^o 7. or *Impost* 1690.

And where there are two Numbers annexed to the Letter or Letters, the firft has refpect to the *Impost* 1690, and the latter to the *Impost* 169 $\frac{2}{3}$, as in the Cafe of *Wrought Silks*, &c.

Speaker of the House of Commons.

CHAPTER

CHAPTER the Third.

Containing Directions for, and Examples of, the Method of,

- I. The Computation of *The Duties to be paid* on all Goods and Merchandizes Imported, Exported, and brought Coastwise.
- II. The Computation of *The Duties to be repaid, or drawn back* upon the *Exportation* of such Foreign Goods as are entitled thereto.
- III. The Allowances of *The Drawback, or Bounties* on the Exportation of several *British* Goods to Foreign Parts, and of the *Premium on Naval Stores* imported from the *British Plantations, and Scotland*.

IN order to the Computation of the Duties and Drawbacks on Goods Imported, Exported, and brought Coastwise; Recourse must be first of all had to the particular Species of Goods in Chapter the second, under the proper Distinction of INWARDS, OUTWARDS, or COASTWISE, as may be the Case; where, in most Instances, they will be found RATED under their proper Initial Letters, unless they are but one particular Species of many other of the like nature, for which there are general Heads erected, as for *Corn, Drugs, Furs, Grocery Ware, Linen, Wood, &c.* Or if they have not been rated by any particular Act of Parliament, yet if they are liable to any particular Duties, they will be likewise found under their proper Initial Letter, or general Head, with the Duties thereon charged, *For every 20s. of their Values upon Oath.* And for all Goods that are neither particularly rated, nor liable to any particular Duties, there is one *General Rule* inserted after Poundage Goods Inwards, Page 257.

The particular Species of Goods, whose Duties or Drawbacks are desired to be known, having been found by the foregoing Directions; in order to compute the said Duties, or Drawbacks, the following Instructions must be carefully observed.

And as the Duties on Foreign Goods imported, and their Drawbacks, when afterwards exported in Time, are of two distinct Kinds, *viz. TONNAGE and POUNDAGE*; I shall therefore distinctly treat of their Computations.

I.—TONNAGE.

This is the Distinction for the Duties payable on WINEs imported, because charged after the Rate of so much *per Ton*; the several respective Branches whereof have been already fully and particularly explained under their proper Heads, by having first shewn the gross Duty, next the several particular Discounts,

counts, and lastly, by having inserted the Neat Duty remaining to be paid or secured, for one *Ton*, and one *Gallon*, after the Deduction of the said Discounts, according to the several Circumstances of Entry.

So that when the several particular Branches, to which any sort of Wines are liable, and which compose the total Duties, are desired to be known; that particular sort, observing the Circumstances of Importation, and the Nature of the Entry, must be sought for between Page 259, and Page 265, and opposite thereto, in the last Column, will be found a REFERENCE, denoting the said particular Branches; the Use and Nature whereof I shall fully illustrate and explain in the following Example.

Suppose, two Casks containing one Ton of Spanish Wine, unfill'd, for Sale, imported into the Port of London, by British, in a British Ship qualified, all Duties paid down.

Upon Recourse to Page 259, (one of those before-mention'd,) in the last Column thereof, opposite to this sort of Wine, under this Circumstance of Entry, will be found the Reference *Z b*; which Reference being sought for, in *The Table of the References*, &c. in Page 296, it will be found to denote, that the Branches 1, III, 2, 3, 4, 5, 14, are in this Case payable.

But to discover the particular Sums, that are to be charged for the aforesaid Branches; they must each of them be consulted in the manner hereafter exemplified, *viz.*

N ^o 1. or Old Subsidy	Upon Recourse to this Branch, under the Distinction of <i>Tonnage</i> , it will be found, That <i>Spanish</i> , &c. Wines in Casks, imported into London, pay the same as <i>Levant</i> Wines, imported into London, <i>Bristol</i> , or <i>Southampton</i> ; which, by <i>British</i> unfill'd is, Neat	3. 10. 2 $\frac{1}{2}$
N ^o 2. or New Subsidy	Upon Recourse to this Branch, under the Distinction of <i>Tonnage</i> , it will be found, That the Neat New Subsidy is the same as the Neat Old Subsidy; which in this Case was	3. 10. 2 $\frac{1}{2}$
N ^o 3. or $\frac{1}{3}$ Subsidy	Upon Recourse to this Branch, it will be found to be One third Part of the Neat New Subsidy; which is	1. 3. 4 $\frac{1}{2}$
N ^o 4. or $\frac{2}{3}$ Subsidy	Upon Recourse to this Branch, it will be found to be Two third Parts of the Neat New Subsidy; which is	2. 6. 9 $\frac{1}{2}$
N ^o III. or Additional Duty	Upon Recourse to Wines in this Branch, it will be found, that all other Wines, except those particularly charged, (among which <i>Spanish</i> is not included,) in Casks, unfill'd and paid, pay, Neat	2. 17. 1 $\frac{1}{2}$
N ^o 14. or Coinage	Upon Recourse to this Branch, it will be found, that all Wines, except <i>Prisage</i> Wines, pay	0. 10. 0.
N ^o 5. or Imposit on Wine	Upon Recourse to this Branch, it will be found, That all other Wines, except those particularly charged, (amongst which <i>Spanish</i> is not included,) for Sale, unfill'd and paid, in Casks, pay, Neat	8. 0. 7 $\frac{1}{2}$

The Total Duties to be paid *£* 21. 18. 3 $\frac{1}{2}$

R r

And

And after the same manner may the Duties of all other sorts of Wines, under what Circumstances soever, be computed ; observing, that when any number of Tons or Gallons are enter'd, the respective Duties *per* Ton must be multiplied by the number of Tons given, and the Duties *per* Gallon, by the number of Gallons given.

As for Example :

Suppose 12 *Casks cont. 5 Tons, 34 Gallons, Portugal Wine unfill'd, imported into the Out-Ports, by British, &c.*

Old Subsidy <i>per</i> Ton	2.	6.	9.	12					
The number of Tons given				5					
Old Subsidy for 5 Tons	11.	14.	0.	0			11.	14.	0
Old Subsidy <i>per</i> Gallon				,009285					
The number of Gallons given				34					
				37140					
				27855					
Old Subsidy for 34 Gallons				,315690			0.	6.	3½
Old Subsidy for 5 Tons 34 Gallons							12.	0.	3½

And so for all other Duties.

But for the greater Ease and Dispatch in computing the several Duties on Wines ; and as many of the Officers of the Customs are not acquainted with Decimal Arithmetick, I would recommend the Use of my Table, printed Anno 1721, under the Title of, *A Complete Table of the Duties upon Wines and Vinegar, &c.* where each Branch will be found ready computed, to the twentieth part of a Penny, for any Quantity, from *one Gallon to fifty Tons.*

Note, The Old Subsidy of *Perry, Rape of Grapes, Syder, Syder-Eager, and Vinegar,* being likewise under the Regulation of Tonnage, is to be computed by the foregoing Directions.

II. — P O U N D A G E.

This is the Distinction for the Duties, payable on all Goods imported, except *Wines*, and for all the Duties but the Old Subsidy on *Perry, Rape of Grapes, Syder, Syder-Eager, and Vinegar,* because mostly to be levied and collected at so much *per Pound*, or *per Cent.* of the Rates or Values of the Goods, as is fully and particularly explained under the several Branches : And therefore the first Step towards the Computation of this kind of Duties, is to be able, at sight, readily to take *The 5 per Cent. or 12 d. in the Pound* of any Sum whatsoever : For which Purpose I would advise, that the following Table be learnt by heart.

And the more easily to recollect the aforesaid Table, as also to enable you to discover the 5 per Cent. of any larger Sum, it need only be consider'd, That 5 per Cent. is the $\frac{1}{20}$ part, and that therefore there must be accounted,

For every —	Twenty Pounds	1.	0.	0
	Twenty Shillings, or one Pound	0.	1.	0
	Twenty Pence	0.	0.	1
	Twenty Farthings, or 5 Pence	0.	0.	0 $\frac{1}{2}$

As for Example :

What is the 5 per Cent. of £. 7354 : 17 : 6?

The $\frac{1}{20}$ part, or half the Pounds, exclusive of the last Figure	—367.	0.	0
The <i>l.</i> 14 remaining, accounted at so many Shillings	—0.	14.	0
The <i>17 s.</i> 6 <i>d.</i> valued by the Table	—0.	0.	10 $\frac{1}{2}$
The 5 per Cent.	—367.	4.	10 $\frac{1}{2}$

By the foregoing Directions and Example, I apprehend, that a Person of but very little Skill in Arithmetick, may, with Ease, be capable of discovering the 5 per Cent. of any Sum whatsoever : So that now supposing him to be very expert therein, I shall next proceed to shew its Use, by giving Directions for, and Examples of the Method of the Computation of the Duties of POUNDAGE.

And in order to discover the several Neat Branches to which any sort of

POUNDAGE Goods are liable, it must be observed,

- I.—That the said Goods must be sought for amongst THE RATES OF MERCHANTIZE INWARDS, (as mentioned between Page 71, and Page 257.) under their proper Initial Letters, or the general Head wherein such Goods are, by their Nature, likely to be comprehended.
- II.—That when the Goods are there found, the Quantity for which the several Branches are desired to be known, must be computed at the Rate affixed to such Goods in the first or second Column, whether it be by the Pound, Yard, Ell, or Hundred, &c.
- III.—That if such Goods are not found to be any where Rated, or tho' expressly Rated, are yet liable to some particular Duty, or Duties, according to their Values upon Oath ; such Value must be ascertained by the Importer, as directed under the proper Branches.
- IV.—That after the Amount of the Goods at their respective Rates, or according to their VALUES UPON OATH, is thus discovered ; you may then proceed to the Computation of the several particular Branches to which such Goods are liable, and which compose the *Total Duties* ; by the Assistance of the REFERENCES in the last Column, which shall be found to stand opposite to their respective Rates ; the Use and Nature whereof are fully illustrated and explained, in the following Example.

Suppose 20 *Casks*, cont. 250 C. of *Brimstone*, not French, imported by British.

Upon Recourse to the Letter *B*, it will be found, That *Brimstone* }
 is rated at 6 s. 8 d. per Hundred weight, cont. 112 lb. at which } 83. 6. 8
 Rate, the above Quantity amounts to ————— }
 And that in the last Column, opposite to such Rate, is the Reference—B 5
 Which Reference being sought for in *The Table of the References*, &c.,
 in Page 296. it will be found to denote, that such *Brimstone* is } 1, 2, 3, 4, 7
 chargeable with the Branches ————— }

But to discover the particular Sums that are to be charged for each of the afore-
 said Branches; they must each of them be consulted in the manner hereafter
 exemplified, *viz.*

Upon Recourse to this Branch, under the Distinction of POUNDAGE, it
 will appear,
 I.—That it is to be levied according to the par- }
 ticular Rates, &c. of the Goods; which, in } 83. 6. 8
 thi. Example amounts to, as before ————— }
 II.—That for all Goods, except those otherwise }
 charged, it is to be computed at 1. 5 per Cent. } 4. 3. 4
 of the Rate, &c. which is ————— }
 III.—That for all Goods, except those for which }
 there are particular Directions, there must } 0. 4. 2
 be allowed a Discount of 1. 5 per Cent. which }
 is ————— }

Which reduces it to ————— 3. 19. 3
 Upon Recourse to this Branch, under the Distinc-
 tion of POUNDAGE, it will appear,
 I.—That it is to be levied according to the par-
 ticular Rates, or Values therein mentioned at
 1. 5 per Cent. for all Goods not otherwise par-
 ticularly charged.
 II.—That for all Goods, but *Tobacco*, there is to be
 allowed a Discount of 1. 5. per Cent.
 III.—That therefore, in this Case, it will be the }
 same as the *Old Subsidy*; which was ————— } 3. 19. 2

No 3. or $\frac{1}{3}$ Subsidy— Upon Recourse to this Branch, it will ap- }
 pear to be One third Part of the *New* }
New Subsidy; which is ————— } 1. 6. 4 $\frac{1}{2}$

No 4. or $\frac{2}{3}$ Subsidy— Upon Recourse to this Branch, it will ap- }
 pear to be Two third Parts of the *New* }
New Subsidy; which is ————— } 2. 12. 9 $\frac{1}{2}$

Upon Recourse to this Branch, it will appear
 I.—That *Brimstone* (the 5th Article of this Duty,
 and to which you are the more readily di-
 rected by the Figure 5 annexed to B, the
 Letter of Reference,) is chargeable with 4 s.
 8 d. for every Hundred weight cont. 112 lb.
 at which Duty, the Quantity in this Example
 amounts to ————— } 58. 6. 8
 II.—That it may be secured for $\frac{4}{12}$ Months,
 but if paid down, to be allowed a Discount of }
 1. 6 $\frac{1}{2}$ per Cent. which is ————— } 3. 12. 11
 Which reduces it to ————— 54. 13. 9

The Total Duties to be paid ————— 66. 11. 3

The

The foregoing are the several Neat Branches, as they are to be charged in the King's Books; being the Method of Computation most agreeable to the Words of the several Laws which impose the said Branches, and which is usually practised in all the Ports of *England*, except *London*; where the Subsidies are computed upon the Bills, according to the Rates or Values of the Goods, and the other Duties at *twenty times* the Sums thereon imposed; so that in posting the said Branches into the Books, only the one twentieth Part of each of them must be charged: But as the former Method is not only the most natural, but also the most expeditious, by reason that the Duties consist of much smaller Sums, and is likewise more easy, and less subject to mistake, because the Sums that are computed on the Bills, are the same that are to be charged in the Books; I shall give only one Example of the other Method of Computation, and in all the succeeding Examples, shall perform their Operations in the real Sums,

The foregoing Example computed according to the *Gross Weight*, &c.
agreeable to the Practice of the Port of *London*,

And though the Officers of the Customs are obliged to compute the several particular Branches, to which any Species of Goods are liable, because they are to account for each of them separately; yet as a Proof of their Operation, I would advise, that upon the *quantity of Goods given*, there be likewise computed the *Total Duty*, according to the Sum charged thereon in the third and fourth, &c. Columns, opposite to their respective Rates: And as to Merchants, it being not at all material to them to know the several Applications which are to be made of the Sums by them paid; this is the only part of Computation, with which they need acquaint themselves.

The foregoing Example computed according to The Total Duty,

Upon recourse to *Brimflane*, as before directed for the several Branches, it will appear in the third Column, opposite to the Rate thereof, that the *Total Duty* to be paid by *British*, is for every Hundred weight cont. 112 lb. ———— } l. s. d.
0 5 3 1/3

Therefore

Therefore the Quantity given, must be computed at that Sum; thus.

The Total Duty, as before—66. 11. 3

And after the manner of the aforesaid Examples, may the particular Branches, or the total Duties of all other sorts of Poundage Goods be computed: But as the Computation of the Duties is not only the most material, but also by far the most difficult part of the Business of the Customs; and tho' I have so fully exemplified and explained each Branch, and given such ample Instructions for discovering the several Branches that are to be charged for any Species of Goods; yet as I am very sensible, that the best and fullest Instructions I am capable of giving, for the Computation of the Duties, would scarce be sufficient, unless illustrated by Examples; I have formed such a Set of Examples, as do comprehend all the various Instances that can occur in Practice; and which I dare venture to affirm, will, with due Consideration thereof, make any Person that has a tolerable notion of Figures, a perfect Master of Computation.

SECTION the FIRST.

Examples of the Computation of the several Branches of the Customs payable on Goods and Merchandizes imported, under all the different Circumstances of Entry or Importation; whether from *France, East-India, or any other Parts*, and not only for *single Articles*, but also for *several kinds of Goods mixt together*.

I.—From any other Parts than *France or East-India*.

II. Sundry Articles of Goods mint together.

Tho' the foregoing Examples may be sufficient to shew the Nature of the Computation of the Duties on *any one single Article* of Goods; yet, as in Practice, it will be found, that *several Articles*, and which are subject to quite different Duties, do frequently occur in the same Entry; I shall next give Instances thereof, in some of the most material Products of those Countries with which *Great-Britain* does most chiefly trade: But before I enter upon these Examples of *sundry Articles*, it is necessary to be observed, that the most ready and easy Method for a Learner, (who must of course be obliged to consult the Book for the Duties of each Article,) is to make use of Paper either folded or ruled in Columns, wherein he may distinctly charge all the several Branches to which each Article is liable, before he proceeds to the next; which gross Branches being added up, and their proper Discounts deducted, will produce the several Neat Branches to be paid for all the Goods in that Entry: But tho' this Method is the most natural and easy, yet it is not so practicable, because the Bills of Entry being usually no larger than a Quarter of a Sheet of Paper, they will not admit of a sufficient number of Columns: And there-

therefore I shall exemplify the Method usually practised; which is, to use but one Column only, wherein to charge the Amount of the Rates, opposite to each respective Article, in order to discover the Old Subsidy; and to charge the several other Branches, under the distinction of their proper Numbers, in the vacant Spaces of the Bill.

III. Goods from *France*, or of the Product of *France*, &c.

Besides the Directions before given for the Computation of the Duties on Goods imported from foreign Parts, it must be further observed with respect to *French Goods*,

- I. That they are chargeable with all the several Duties (except Impost 1690.) as if they were of the Product of, or imported from, any other Place, unless *East-India* or *China*.
- II. That all *French Goods* and Merchandizes (except *Brandy*, *Salt*, *Vinegar* and *Wine*) are over and above all other Duties, chargeable with Impost 1693, after the Rate of *l. 25 per Cent.* as in Page 32, Article 36; unless they are particularly charged for the said Impost, at an higher Rate; and then instead of the said *l. 25 per Cent.* they must be taken at such Rate, as is the Case of *Bacon*, *Catlings*, and *Necklaces*.
- III. That as to such Goods as are of the Growth, Product, or Manufacture of *France* itself, except *Brandy*, *Vinegar*, and *Wine*, they are also chargeable with a second Duty after the Rate of *l. 25 per Cent.* as in Page 40.

As to the Computation of the Duties on *ſundry Articles of French Goods mix'd together* in the ſame Entry; I apprehend, that the Directions before given for *ſingle Articles of French Goods, and for ſundry Articles of other Goods*, will be ſufficient, without Examples, and therefore I ſhall not inſert any.

IV. Goods from *East-India* or *China*.

Besides the general Directions before given for the Computation of the Duties on Goods imported from foreign Parts, it must be further observed with respect to Goods of the Growth, Product, or Manufacture of the *East-Indies* or *China*,

- I. That all MANUFACTURES of *India* or *China* (except *Indico* and *Arrack*) are besides the several Duties payable on the like Goods from other Places; to be charged with Impost 1690, after the Rate of *l. 20 per Cent.*
- II. That such Goods as are rated in the first Column of the Book of Rates, may be enter'd by Bills at sight, and Security taken under the common Seal of the Company, for Payment of one half of the Duties at the End of six Kalendar Months, from the time when the Ship was, or ought to have been reported; and for the other half, at the End of twelve Kalendar Months from the said Report; and yet the same Allowances and Deductions are to be made to the said Company, as are made to other Merchants paying down the Duties before landing.

6 *Ann.* cap. 16. §. 11.

10 ———— 29. — 1, 2.

- III. That for such Goods as are not particularly rated in the first Column of Rates, but are chargeable with the Duties *ad Valorem* (except *Japanned and Lacquer'd Wares*;) upon Entries thereof at the Custom-House, and before landing, the Importers are to give Security by Bond, with two or more sufficient Sureties for Payment of the said Duties according to their real Values, as soon as the Goods shall be sold, and for exposing them to Sale openly and fairly, by way of Auction, or by Inch of Candle, within the City of *London*, within three Years after the Importation: And that the aforesaid real Values, according to which the Duties are to be paid, are to be reckoned according to the gross Price at which such Goods shall be sold; after a Deduction made of so much as the Neat Duties, payable for the same to his Majesty, do really amount unto (except the Duty of *l. 5 per Cent.* payable to the Crown for the Use of the Company,) and of so much as the Company shall, *bonâ fide*, allow for Prompt Payment to the Buyers at such Sales; and likewise of *l. 6 per Cent.* upon the whole Value, to the Company, for their Charges in keeping the said Goods from the Importation, to the time of Sale.

12 & 13 *W. III.* cap. 11. §. 15.

2 & 3 *Ann.* ———— 9. — 6, 7.

6 ———— 13. — 11.

7 *Geo. I.* ———— 21. — 11.

10 ———— 19. — 47.

Note, *The Company's Allowance to the Buyer, for Prompt Payment, is l. 6 ½ per Cent.*

- IV. That as to *Japanned and Lacquer'd Wares*, the Duties thereof are to be paid according to their full, true and real Values, to be ascertained by the gross Price at which they shall be sold by the Candle. 12 & 13 *W. III.* cap. 11. §. 15.
- V. That as to *Callicoes and Dमित्त*, part of the Duties are payable according to their respective RATES, and part according to their REAL VALUES, as ascertained by their Sale at the Candle, as in Page 39.
- VI. That as to *Arrack*, the Duties payable thereon are the same as *French Brandy*, as in page 226.

Examples of the Computation of the Duties on *East-India*, or *China* Goods.

I. RATED GOODS.

As there is nothing particular to be observed, in relation to the Duties on those Goods, excepting, that if they are manufactured, they are liable to *l. 20 per*

per Cent. for Impost 1690; I concluded, that after so many Examples of single Articles of other Goods, I might very properly comprehend all that was necessary to be noted on this Head, in one Example of *several Goods mixt together.*

F. UNRATED GOODS.

As to the several Duties to which these Goods are liable, it is only to be observed, as before for Rated Goods, that if they are manufactured, (except *Arrack*) they are subject to *1. 20 per Cent.* for Imposit 1690 : But as the Duties are to be paid according to the *real Values sold for at the Candle*, after a Deduction of the Neat Duties, and the Company's Allowance and Charges ; the said Values will differ according to the particular Branches, to which any Species of Goods are subject ; and therefore the only Difficulty is in reducing the Values, by making the true and proper Deductions : The Nature whereof is fully illustrated in the following Examples :

1000 lb. *East-Indian Wax-Candles* sold for £. 100.

The Gross Value—100. 0. 0—100. 0. 0

The uncertain Gros Duties—33. σ . o The cert. Dut. 33. 6. 8)

45. 16. 8

. o. o The Charges 12. 10. 0 } —————
Which reduces the Value to ———— 2. 10. 0

Then for

As the advanced Value of $1/100$ is 0.01 to $1/100$ is 0.01 the Gross Div-
 1

As the advanced Value of 7.133. 8. 8 is to 7.33. 8. 8 the Gross Duties: so is 7.54. 8. 4 the neat Value to the neat Duties of ——— \$13. 8. 9¹/₂

The reduced Value—40. 14. 6½

Or,

As the advanced Value of £. 123. 0. 0 is to £. 100. 0. 0 the gross 7

Value; so is 1. 54. 9. 4 the gross reduced Value, to the neat 40. 14. 6½

reduced Value of _____

And

And that this is a true Method, is thus demonstrable; for if

To the reduced Value (as before)	40. 14. 6½
Are added { the Duties certain	33. 6. 8
{ the Duties uncertain	13. 8. 9½
{ the Allowance of 12½ per Cent.	12. 10. 0

The Total makes the Value sold for 100. 0. 0

By which it is evident, that no more is deducted than the Duties and Charges do really amount unto.

See the Operation at large in Example the ninth.

And after the same manner I have given Examples of *reducing the Values* of all other sorts of Goods, in order fully to shew the Nature and Reason of the Operations: But as in common Practice it would be too tedious to perform such Operations, for every different Quantity of each Species of Goods which may frequently occur; I have, at the Root of each Operation, inserted the reduced Value, in Decimals, for every 20 s. of the Value sold for at the Candle: So that if the Value for which any Commodity is sold, be reduced into a Decimal, and multiplied by such its respective reduced Value of 20 s. the Product will be the reduced Value, upon which the Duties are to be computed.

The Duties on Japann'd and Lacquer'd Ware, are, by the 12 and 13 W. III. cap. 11. §. 15. to be computed according to the Gross Price at the Candle; and there-

therefore the Value is not to be reduced by making any Deduction for Duties, &c. as directed by 1 & 3 Ann.

By the several foregoing Examples and Directions, I have endeavour'd fully to explain the Nature and Method of the Computation of the Duties on Goods and Merchandises regularly imported: But there being two other Instances, wherein there is often required an Operation previous to the Computation of the Duties, I shall conclude this Head, with giving proper Instructions and Examples.

- I. Goods brought into his Majesty's Warehouses for Security of the Duties; and after having remained there unenter'd for the Space of six Months, sold to the highest Bidder, in Pursuance of the Acts of 12 Ann. cap. 8. §. 11. and 12 Geo. I. cap. 28. §. 19.

And therefore the Quantity must be reduced after the manner of the next Example, and will be found to be 264 $\frac{1}{2}$ lb. the Duties whereof are equal to the neat Produce of the Sale, as appears by the following Operation ; being the Proportion in which the said Produce is to be charged.

SECTION the SECOND.

Directions for the Computation of the several Branches of the Customs, &c. that are to be DRAWN BACK or REPAID upon the due Exportation of foreign Goods and Merchandizes, in Time.

IF foreign Goods and Merchandizes, which have been regularly imported, and for which all Duties have been duly paid, are again regularly exported, to foreign Parts, *within three Years from the Importation*, accounting from the Master's Report of the Ship; they are entitled to a Drawback or Repayment, either of the whole, or of part of the Duties before paid, unless they are such Goods as are particularly excepted.

As to the Method of the Computation of the Duties to be drawn back on Exportation, it is entirely the same, as is before exemplified for Importation; and therefore I do not apprehend there is any occasion for Examples: But in regard that in some Cases, not any, and in other Cases, only a part of the Duties paid at Importation, are to be repaid on Exportation; I have for the greater Ease and Certainty in the Computation of the Duties to be drawn back, formed a Table of all the Exceptions to that general Rule of drawing back, *all but a Moiety of the old Subsidy*, as they are to be found at the end of each Branch.

It may be lawful for the Owners or Possessors of the several Wharfs called *Lyon-Key*, *Somer's Key*, *Dice Key*, and *Sab's Dock*, to fill up, or wharf over and enlarge into the River of *Thames*, so much as will make the Front of their Wall or Campshot range equally with the adjoining Keys or Wharfs.

It shall not be lawful for any Person to build any Outsetts, Jets, Penthouses, Warehouses, Rooms, Lodgings, or any manner of Posts, Sheds, or Buildings, contiguous or annexed to the said Cranes, or any part of the open Wharf of 40 Feet in Breadth, described as aforesaid, more than what is convenient about the Cranes, for the Wheels to work in and upon, and sufficient Covering thereunto, not exceeding the Height, Breadth and Length aforesaid. And for further Ornament, those Cranes to be laid in Oil and coloured Blue, and in the Front thereof towards the *Thames*, be placed the King's Arms, painted and set in an Escutcheon, or other Frame, with a decent Moulding about it, of at least $4\frac{1}{2}$ Feet Diameter.

That all the Passages, Lanes, or Cartways leading to the said Keys or Wharfs from *Thames-street*, and every of them, be made of the Breadth of 11 Feet at the least: But if any was of a larger Breadth or Dimension heretofore, this shall not be construed or meant to lessen or streighten it, but that it continue at the ancient or larger Dimension.

The several Keys and Wharfs described and allowed to be free Places for Shipping and Landing of Goods and Merchandizes, as aforesaid; and which, according to the Tenor of the said Act of Parliament, for rebuilding the said City, is and ought to be left open and free at the Distance of 40 Feet from the Water-side, shall not be separated or divided one from another by any House, Wall, Pale, Post, Rail, or other Impediment whatsoever, but only by mere Stones or Marks in the Pavement, for the distinction of Propriety, and not otherwise.

If any Wharfinger or Owner of any of the Wharfs or Grounds allowed for Shipping, Lading, or Landing of Goods or Merchandizes, as aforesaid, do not conform to the present Form, Rules and Method hereby prescribed and directed for their Wharfs, Cranes or Buildings, or hereafter shall discontinue or alter the same, or make new Encroachments thereupon; after publick notice given by any three or more of the principal Officers or Farmers of his Majesty's Customs, by fixing up a Writing under their Hands, upon the Wharf where the Fault shall be committed, declaring the Offence, and limiting a day and time for the Amendment thereof; which if not amended or performed accordingly,

accordingly, that then such Wharf, or Crane, shall from thenceforward be no more repp'd or taken, to have the Benefit or Privilege as a lawful Place of Shipping, Lading, or Landing of Goods or Merchandize; but be thenceforward utterly debarred thereof, unless restored by his Majesty's special Warrant; and nevertheless the said Buildings, Alterations, and Incroachment, to be demolished and removed, as the Law in that case hath directed.

If at any time it shall seem reasonable to the principal Officers or Farmers of the Customs for the time being, and consistent with his Majesty's Service, to give Sufferance or Permission for the Shipping, Lading or Landing of any Goods or Merchandize, at any other Place or Places, or in any other manner than is herein before nominated and advised, or assigned to be lawful Keys and Wharfs; it shall and may be lawful for them so to do; and such Sufferance and Permission shall be good and warrantable, without any Forfeiture or Advantage to be taken against the Goods so landed, notwithstanding any thing herein before declared to the contrary.

Whosoever shall accept of, or from henceforward employ any of those Keys or Wharfs, by virtue of such Concessions, to the Use of Shipping, Lading or Landing of Goods or Merchandize, it is to be understood, and it is declared to be with this Covenant and Condition, that they perform all and singular the Orders, Assignments, and Appointments, which on their parts and behalfs is before declared to be performed and done, and not otherwise.

The several Wharfingers or Possessors of any of the said Keys or Wharfs, or their Servants, shall not suffer to stand or remain upon their Wharfs or Passages leading to them from *Thames-street*, any more than such Cars or Carts as shall be immediately called to lade or take up Goods, Wares or Merchandize there.

To prevent all future Differences and Disputes touching the Extent and Limits of the Port of *London*, and the many Frauds and Abuses which have been acted and committed, as well upon and within the River of *Thames*, as without the Mouth thereof upon the Sea; the said Port is declared to extend, and be accounted from the Promontory or Point called *The North Foreland*, in the Isle of *Thanet*, and from thence Northward in a supposed right Line, to the opposite Promontory or Point called *The Naes* beyond the *Gunfleet*, upon the Coast of *Essex*, and so continued Westward through the River of *Thames*, and the several Channels, Streams, and Rivers falling into it, to *London-Bridge*: Saving the usual and known Right, Liberty, and Privilege to the Ports of *Sandwich* and *Ipswich*, and either of them, and the known Members thereof, and of the Customers, Comptrollers, Searchers, and their Deputies, of and within the said Ports of *Sandwich* and *Ipswich*, and the several Creeks, Harbours, and Havens to them, or either of them respectively belonging, within the Counties of *Kent* or *Essex*: But that every Part and Place of the River *Thames*, and Sea, within the Limits and Bounds aforesaid, not included or belonging to the said Ports of *Sandwich* or *Ipswich*, or the several Creeks, Harbours, or Havens, to them or one of them respectively belonging, within the said Counties of *Kent* or *Essex*, shall be deemed and taken to be within, and Part and Parcel of the Port of *London*.

No further or other Passage to be made or enlarged to the Wharfs, or any part of the River of *Thames* from *Thames-street*, within the Limits aforesaid, other than the ancient and common Passages to the same.

CHAPTER the Fifth.

THE INDEX,

CONTAINING

The Sense and Substance of the several *LAWs* now in force, relating to the *Customs, Navigation, and Trade*, with References to the *A c t s* at large, and likewise to each Occurrence in the whole Book: Disposed under proper Heads in Alphabetical Order.

THIS Chapter is not only a distinct Part, and independent of the former, but contains several things relating to those Parts, which, to prevent Repetition, and other Inconveniences, could not be so properly inserted in every particular Place to which they have any relation; and therefore in every such Place, the proper Heads under which they are comprehended, are referred to in this INDEX: And though it would be superfluous to repeat any thing that is contained in any of the preceding Parts, yet there is not any one Occurrence which is not here refer'd to by the particular Page where it is to be found: so that this Chapter, besides its particular Property, is a complete and general INDEX to the whole Book.

For the better understanding of this Index, it must be observ'd;

1. That upon consulting the several Acts from which each Paragraph was collected, I have always endeavour'd to insert the Sense and Substance thereof under such Heads as I thought they most naturally had relation to: But as it is very possible the Person who wants to be inform'd in any particular Case, may not always happen to seek it under the same Head where I have inserted it; and as many Paragraphs may have respect to more Heads than one. I have under every Head to which any Paragraph could any ways relate, refer'd to the particular Article of the Head under which it is to be found.

2. That in expressing the Sense of the several Laws, I have endeavoured, as far as was practicable in so small a Compass, to do it in the very Words of the Acts, as being the least liable to Misconstruction; and not to omit any material Circumstance: But when it is considered how particularly expressive the several Acts at large are, and consequently how difficult it must be to contract the full and perfect Sense, of perhaps several Pages, in the Compass of little more than so many Lines, I hope it will be some Excuse should any Deficiency or Imperfection be discovered: And though no care has been wanting in my Quotations, yet in all nice Points and doubtful Cases, where there is the most Probability of Danger in trusting to an Abridgment, I would advise, that the Acts themselves be consulted, for your better, and more perfect, and sure Information.
3. That each Paragraph speaks the Sense of the Act or Acts quoted against them, as far as they are now in force: and that where several Acts are refer'd to, the latter either only continue the former, or make some Alterations or Additions in the Circumstances, or else direct intirely new or partly different Regulations: In which case, tho' the former Acts are sometimes expired, and therefore no part of their Substance (unless repeated in the subsequent Acts,) inserted in the Body of the Paragraphs; yet they are always quoted as a Guide to discover the several Variations, should they upon any Occasion be desired to be known.
4. That as to the REGULATIONS prescribed by the several Acts, for Prosecutions therein, and the other Parts of their Execution, the which are mostly general, and for keeping a separate and distinct Account of each Branch, and paying the Money weekly into the *Exchequer* in Specie, and the Penalties for Neglect or Refusal, or for diverting or misapplying any Part thereof, and for the particular Circumstances of their Application and Appropriation, by the respective Acts which revive, continue, or alter the former Powers and Regulations of Collection; I must refer to the Acts at large, as not being absolutely necessary to be inserted, nor consistent with my designed Brevity.
5. That each Head under which any Circumstance is to be sought for, is printed in Roman Capital Letters, and that every particular Paragraph under such Head has Relation thereto: But when any particular Paragraph stands further on than that which preceeds it, such short Paragraph must be understood to have Respect only to the said preceeding one.
6. That some of the Acts being only temporary, it may so happen, that at the Time some particular Paragraph is consulted, the Act or Acts from whence it was collected may be expired; and therefore to prevent the bad Consequence of such a Misguidance, I would advise, that the Table of *The Continuation of the several Acts*, &c. at the End of the Index, be likewise consulted, in order to be assured that the said Act or Acts are still in Force.

And what has been before hinted, concerning the Abridgment and Quotation of the several Acts of Parliament refer'd to in the following Index, must likewise be observed, with Respect to the Acts quoted in the former Parts of this Book.
